

Manage API tokens

InfluxDB **API tokens** ensure secure interaction between users and data. A token belongs to an organization and identifies InfluxDB permissions within the organization.

Learn how to create, view, update, or delete an API token.

API token types

- [All-Access token](#)
- [Read/Write token](#)

All-Access token

Grants full read and write access to all resources in an organization.

Read/Write token

Grants read access, write access, or both to specific buckets in an organization.

Create a token >

Create an API token in InfluxDB using the InfluxDB UI, the `influx` CLI, or the InfluxDB API.

View tokens >

View API tokens in InfluxDB using the InfluxDB UI, the `influx` CLI, or the InfluxDB API.

Update a token >

Update API tokens' descriptions in InfluxDB using the InfluxDB UI.

Delete a token >

Delete an API token from InfluxDB using the InfluxDB UI or the `influx` CLI.

Use tokens >

Use an API token in the InfluxDB UI, the `influx` CLI, or the InfluxDB API.
